

**ARGYLE
CENTRAL SCHOOL**

October 17, 2023

Dear Argyle Families,

I have an update to share regarding the Water Valve Replacement project in the Village of Argyle. I spoke with Water Commissioner Gary Robinson today, and he informed me that the water valves will not be replaced this week or next week due to a delay with the contractor.

Mr. Robinson does not have a definite date for the replacement yet, however, they are looking at the week of October 30, 2023. I requested that the project not be scheduled for Halloween due to the activities at school.

When the valves are replaced, the water will be turned off early in the morning, which means that students will not be in the school building that day. Instead, they will have a remote learning day in order to preserve our snow days and vacation days. Students will use their Chromebooks/iPads to take classes virtually.

While we still do not have a definite date when the water valves will be replaced, we have a better idea of when it could take place. Please keep in mind that the weather and the availability of the contractor will impact the timing. If there are several days of heavy rain, the installation will be delayed again.

Thank you for your patience and understanding as we navigate this process. Please contact the main office at 518-638-8243 with any questions.

Sincerely,

James Bennefield
Superintendent
